About me

I'm motivated for self-improvement and new challenges, open for criticism and advices from team-colleagues and broad-minded. I have a C1 certificate in English. I devote myself to my work to get the best results. I'm a fast learner. I have a lot of interests. I made my girlfriend a ring and a pendant out of brass wire. I can fix my own car.

Projects

E-Commerce-App

- **Stack: MERN (MongoDB, Express, React, Node), Redux, Mongoose, Axios, Bootstrap**
- E-Commerce app with: full featured shopping cart, product reviews and ratings, user profile with orders, admin management (product, user, order), checkout process (shipping, payment method, etc), PayPal/credit card integration
- You can check it online at mj-e-commerce.onrender.com
There is a long first startup, because I use free services, which "goes to sleep" after 15 minutes of inactivity.
- github.com/MateuszJajkowicz/MERN-Stack-E-Commerce-App

Kanban

- **Stack: Angular14, Firebase, Angular Material, PWA**
- Similar application to Trello, where the user can create boards and add tasks in them. You can move tasks between boards and sort them by priority or date. And if you assign a date to a task it will display on a separate calendar view. You can also add friends and share tasks with them.
- You can check it online at mj-kanban.web.app
- github.com/MateuszJajkowicz/Kanban

TicTacToe

- **Stack: Angular11, Nebular, PWA**
- Simple TicTacToe made in Angular11 as PWA
- github.com/MateuszJajkowicz/TicTacToe-Angular

LoveLee - Mobile Dating App

- **Stack: Flutter, Dart, Firebase**
- My graduation application. A dating app different from all others. The user creates profiles of himself and his dream other half. Once completed, the app based on the information given earlier finds for the user a "second half", but only one. This system, compared to others available on the market, is designed to increase users' commitment to the relationship they are building.
- github.com/MateuszJajkowicz/LoveLee-Dating-App

06.2020-03.2022 I had a break from programming during which I did something I always wanted to try, namely working in car detailing and gaining new experiences in life.

Tech skills

- Angular
- TypeScript
- JavaScript
- MERN Stack (MongoDB, Express, React, Node), Redux, Mongoose, Axios, Bootstrap
- Firebase
- Flutter
- Dart
- Git
- GitHub
- GitLab
- Angular Material
- HTML
- CSS
- Postman
- Swagger
- Next.js - *Currently learning*

Soft skills

- Scrum
- CI/CD
- MVC
- Agile
- Teamwork

Languages

- Polish - Native
- English - C1

Work experience

Trainee - fullstack at **Codelab**

July 2022 - September 2022 · 3 months

- **Stack: Angular13, AngularJS, RxJS, Java, Spring Boot, Angular Material**
- My first encounter with Java and Spring Boot
- Converted an in-house CV app from AngularJS to Angular13
- Added some new columns in the tables, new views and stuff like that but as a fullstack it also had to change things in the database and on the backend
- The biggest task I had was to change the login method to one based on openID from auth0, so that everyone could log in with their Microsoft account, they just wanted to give up some other app
- I tested the implemented functionalities with Cypress and Protractor

Software developer and tester at **Comarch**

July 2019 - March 2020 · 9 months

- **Stack: Angular6, AngularJS, RxJS, Angular Material**
- Converted an invoice app from AngularJS to Angular6. That's where I really got to know Angular
- I was responsible for the login and profile page, so there mainly reactive forms, checking if all the data is correct, if so it unlocks the button and such things
- I added spinner and pagination on the home page, some new filters and views for pdf documents
- I made localization of the entire site

Education

Applied Computer Science Engineer's degree, **Politechnika Krakowska im. Tadeusza Kościuszki**

October 2017 - February 2021

Certificate in Advanced English - **C1 Advanced**

2020

Courses

MERN eCommerce From Scratch by **Brad Traversy**

Angular Fundamentals & Angular Pro by **Todd Motto**

Angular - a complete course from scratch by **Zaczniij Programować**

TypeScript Course for Beginners by **Academind**

JavaScript Programming for Beginners by **Zenva Academy**
